HUMMEL BRAND HISTORY

→ 1923

Albert Messmer develops one of the first football cleats in the world. With his brother Michael Ludwig Messmer, he founds the company Messmer & Co., that will go on to become known as hummel.

→ 1956

The visionary Bernhard Weckenbrock takes over the company. He creates a comprehensive brand identity and introduces the chevrons.

1969 ←

The first sportswear collection is launched. Sponsorships are signed and help boost sales. A rounder version of the bumblebee than the current one is created.

1968 ←

The first sponsorship deal is signed. The deal is with Duisburg, a team playing in the 2nd German Bundesliga.

1970

hummel is introduced to the Northern European market.

1979 →

hummel signs a sponsorship deal with the Danish national team for the first time – a deal that lasts until 2004.

→ 1988

hummel signs a sponsorship deal with Real Madrid and the club's biggest star, Emilio Butragueño. The deal makes hummel products even more popular.

→ 1999 →

hummel gets a new owner – Thornico. Christian Stadil becomes part of the brand history. He launches a reintroduced, original sport style collection on the fashion market and hummel becomes a trendsetting sports apparel brand.

→ 1992 →

It's a surprising win, to say the least. The Danish national team takes the title at the European Championships having played Germany in the final.

2016

↓

← 2013

hummel celebrates its 90th birthday with the relaunch of a range of heritage styles.

← 2017

The Danish women's team wins silver at the Women's Euro Championship in the Netherlands, losing to the Netherlands in the final.

2019

In 2019, hummel substantiates its status as an original handball brand by signing the German handball club, THW Kiel – unarguably one of the biggest clubs in the World.

After many years hummel once again sponsors a team in the German Bundesliga. SC Freiburg plays a sensational first season after returning to the first league and qualifies for international competition.

→ 2020

In 2020 hummel team up with the historic football club Everton FC and return to the Premier League after 13 years of absence. The chevrons are back on the biggest football stage again!

1000+ SPONSORSHIPS

hummel is proud to sponsor a powerful, inspiring and unparalleled roster of teams, clubs, and players in countries all over the world. Together, they form #teamhummel – and in different ways, they bring character, strong social values, and commitment

to the game. To bring some of our key collections to life, we have visited six of the clubs we sponsor – and at hummel, we work hard to create even closer relationships with all partners in the years to come.

ASTRALIS

H U M M E L E N T E R S E - S P O R T

It's time to kick-start a new era within esports. And why not start from the top? In the summer of 2020 hummel announced a historic partnership with Astralis Group, who owns and operates the three globally leading brands: Origen in League of Legends, Future FC in FIFA, and the Counter-Strike team Astralis. All teams in the Astralis Group portfolio are among the best in the world with a massive fan base and with a total esports audience

reaching almost 500 million people this year, hummel is beyond proud to become a part of this exciting and fast-growing industry.

HANDBALLS HANDBALLS

FROM PROFESSIONAL TO PRACTICE BALLS, HUMMEL OFFERS A DIVERSE RANGE FOR ALL KINDS OF PLAYERS AND TEAMS.

- AIRTOUCH CUSHIONING FOR EXTRA SOFTNESS AND BOUNCE
- WOVEN POLY/COTTON LINING THAT STABILIZES AND ADJUSTS SOFTNESS/WEIGHT
- LATEX BLADDER WITH AIRTRAP VALVE FOR AN AIRTIGHT BALL

Reliable handballs with predictable flight and a good bounce are essential. hummel offers a competitive range of quality handballs – from

high-performance match balls to training balls for children. All handballs are made from durable PU (Polyurethane).

HYBRID HANDBALLS

UNIQUE DOUBLE BLADDER CONSTRUCTION

Inner and outer rubber bladders reinforced by a cotton and polyester lining for a perfect mix of bounce and stability. The inner bladder makes your ball vivid and bouncy, while the unique second bladder takes the bounce to new heights!

STRONG HYBRID CONSTRUCTION

Hybrid handballs are extra strong and durable. All PU hexagons are machine-stitched and glued together before being hardened under compression giving a super smooth surface and a perfect roundness.

THICK FOAM-BACKED PU SURFACE

With Air Touch foam to back a thick PU surface, you're sure to experience extra softness and a better grip. The PU of Storm Pro has even been upgraded with a microfiber padding providing a whole new dimension of softness.

REGULAR HANDBALLS

TRADITIONAL RUBBER BLADDER

Inner rubber bladder covered by a white cotton and polyester lining giving you a great mix of bounce and stability when you set your ball in motion.

FOAM-BACKED PU SURFACE

All PU hexagons are hand-stitched and backed with foam of different thicknesses depending on the type of ball best suited for your game plan.

HANDBALL INFLATION GUIDE

PREPARATION

During wintertime, we suggest to store the handballs at room temperature (20 – 25°C) for minimum 24 hours before the first inflation in order to secure optimal softness, shape and grip.

VALVE OIL

Drip 1 – 2 drops of hummel valve oil into the valve.
It is important that valve-oil is used at every inflation as it makes the valve seal properly.

INFLATE

Position the valve upwards and insert the inflation needle straight into the valve. Always use a long pump needle to ensure the needle does not damage the valve or the bladder.

CHECK PRESSURE

- Inflate the ball to the recommended pressure.
- Recommended pressure is printed on the ball near the valve.
- Inflate slowly to allow the ball to gain its correct shape.
Rapid inflation can damage the bladder.
- Use a pressure gauge to check the pressure of the ball.

HANDBALL MAINTENANCE GUIDE

BEFORE EACH INFLATION

Always drip 1 – 2 drops of hummel valve oil into the valve before inflation to ensure that it seals properly.

STORAGE

Store the handball in a ventilated room at 20 – 25°C.

FOOTBALLS FOOTBALLS

A BROAD RANGE OF FOOTBALLS FOR PROFESSIONALS AND AMATEURS ALIKE

- HIGH-PERFORMANCE MATCH, TRAINING AND FUTSAL BALLS
- FIFA-APPROVED MATCH BALLS
- AIRTOUCH CUSHIONING FOR SOFTNESS
- AIRTRAP LATEX BLADDER FOR AIRTIGHTNESS AND LIGHTNESS

From professional, FIFA-approved match balls to futsal balls and balls for children, hummel offers a wide range of carefully developed footballs. Many feature special features like AirTouch technology for soft cushioning and

AirTrap latex bladders for responsive, light and airtight balls. All balls are designed with durability in mind, whether they're professional, indoor or practice balls.

THERMO BONDED

INNER CARCASS BLADDER

The restricted carcass bladder does not allow the ball to increase its size. It ensures the stability of the outer cover material and makes the ball last longer.

POLYESTER LINING

The polyester lining strengthens the bond between the bladder and the EVA foam layer in order to improve shape retention for a longer life.

HIGH PERFORMANCE FOAM LAYERING

The EVA foam layer creates a soft touch feel and greater bounce along with high reactive speed off the foot. the ball perfectly round.

PERFECTLY ROUND PU SURFACE

The Thermo Bonded footballs are made with no threat and no stitching. It's made with Heat Infused Technology (HIT), that increases the shape conformity and makes the ball perfectly round.

MACHINE + HAND STITCHED

INNER BLADDER

Inner rubber bladder giving vivacity and bounce to the ball and securing minimum expansion over time.

POLYESTER LINING

Machine Stitched : It controls damage to the foam and helps close seams efficiently.
Hand stitched: 3 – 4 layers of polyester are used as a replacement for foam an improves shape retention and rebound.

LIMITED LAYER OF FOAM

With a very limited foam layer the regular balls are slightly harder than others. Hand stitched balls with no foam at all. .

STITCHED PU SURFACE

Regular footballs are either machine stitched or hand stitched meaning the seams are not sealed. Still with only 10% water uptake.

HYBRID & KINETIC

WEIGHT STABILIZING BLADDER

The fiber wined SR bladder is used to achieve correct weight and strong foundation for the outer cover material.

POLYESTER LINING

The inner lining prevents the foam from cracking and tearing.

EXTRA SOFT FOAM LAYERING

The extra thick foam layer in the Hybrid / Kinetic balls ensures greater durability and life along with reduced impact and a soft feeling on the foot.

RESISTANT PU SURFACE

Still being machine stitched, the Hybrid/Kinetic balls are sealed by heat pressure making the balls last longer and keep them perfectly round.

FOOTBALL INFLATION GUIDE

PREPARATION

During wintertime we suggest to store the footballs at room temperature (20 – 25°C) for minimum 24 hours before the first inflation in order to secure optimal softness and shape.

Unfold the football with both hands and shake the bladder free.

VALVE OIL

Drip 1 – 2 drops of hummel valve oil into the valve. It is important that valve-oil is used at every inflation as it makes the valve seal properly.

INFLATE

Position the valve upwards and insert the inflation needle straight into the valve.

Always use a long pump needle to ensure the needle does not damage the valve or the bladder.

CHECK PRESSURE

- Inflate the ball to the recommended pressure.
- Recommended pressure is printed on the ball near the valve.
- Inflate slowly to allow the ball to gain its correct shape. Rapid inflation can damage the bladder.
- Use a pressure gauge to check the pressure of the ball.

FOOTBALL MAINTENANCE GUIDE

BEFORE EACH INFLATION

Always drip 1 – 2 drops of hummel valve oil into the valve before inflation to ensure that it seals properly.

STORAGE

Store the ball at reduced pressure in a dry ventilated room at 20 – 25°C.

CLEANING AND DRYING

After use clean the football in mild soapy water and rinse with water. Then wipe the ball off with a towel and let it fully dry in a dry, airy place at 20 – 25°C.

Never dry the ball on or near a heating device.
